5. Date of Birth → date

Assignment 8: GET VS POST (Conceptual)

1. What is get method.
Get sends the data through URL
2. What is POST method
POST sends the data securely in background
3. Which is more secure & why?
Post because data not visible in URL

4. Which method is suitable for login forms
POST

5. Real-life User

GET → Search

POST → Login/Registration

Assignment 9:

```
<Form>
```

```
<input type="Text">
```

```
</Form>
```

```
<input type="Submit">
```

```
<label>Name</label>
```

```
<input type="text" required="yes">
```

→ Correct Code

```
<Form>
```

```
<label>Name:</label>
```

```
<input type="text" required>
```

```
<input type="Submit">
```

```
</Form>
```

Assignment 1 : Semantic HTML (Notes)

1. What is Semantic HTML ?

Semantic HTML means using HTML tags that clearly describe the meaning of content.

These tags tell both the browser and developer what type of content is present.
